MEMORANDUM FOR: Deputy Director(Support)

SUBJECT: Future Location of Engineering Division, OC

Several months ago, when it was determined that the new CIA building would not be of sufficient size to accommodate all components, I dropped the space requirements for my Engineering Division from the new building. The future location of this Division is, of course, of great interest to me, particularly with respect to intra-office communications problems, affects on the organizational structure of the Office, and personnel planning. It is therefore requested that this matter be considered at an early date in order that proper planning may be started.

Director of Communications

1st Ind.

To: Director of Communications

11 September 1957

1. The problem which you raise is one which confronts the entire Agency. As you know, a substantial part of the DD/S area, a lesser amount of the DD/I area, and a still smaller part of the DD/P area, will not, according to present plans, fit into the new building.

2. We have been devoting all of our efforts to the new building itself, but within the next few weeks when the tentatives are returned to the architect for preparation of final drawings, I think that we will have time to get started on the over-all study which you suggest. I agree fully with you that this planning should be started as early as possible.

DD/S Distribution:

O - D/Com

1 - C/EPS via D/Log; 1 - DD/S chrono, subject, reading
